

INTRODUCTION TO CYBERSECURITY VIRTUAL WORKSHOP

Sponsored by: U.S. Environmental Protection Agency

Cyber-attacks are striking critical infrastructure across the United States, including water and wastewater systems, with increasing frequency. Recent cyber-attacks on water and wastewater systems have manipulated treatment processes, disabled process control and business enterprise systems, and stolen proprietary data. Cybersecurity best practices and incident response planning can prevent or mitigate many of these attacks and are essential to the sound operation and management of water and wastewater systems.

The U.S. EPA is sponsoring a series of free virtual workshops on water sector cybersecurity. These workshops consist of two half-days. The first day will give water and wastewater systems current information on cyber threats and risk drivers, resources to bolster cybersecurity, and key findings from cyber vulnerability assessments of water and wastewater systems. The second day will lead participants through incident response exercises for cyber-attacks on water and wastewater systems. The overall goal is for participants to identify planning and procedural actions that enhance cybersecurity and mitigate risk in their systems.

The U.S. EPA is offering three different opportunities to participate in this workshop. Workshop participation is open to water and wastewater systems, government officials, and others involved in water sector cybersecurity. Continuing education credits have been applied for in all 50 states. Participants must attend both days in full to receive the credits.

Workshop dates and registration links are listed on the right. For more information or questions regarding workshop registration, please contact: Sarah Bartlett at sbartlett@horsleywitten.com

WORKSHOP DATES, TIMES, AND REGISTRATION LINKS:

SEPTEMBER 15TH
(1:00-4:30 PM EST)

&

SEPTEMBER 16TH
(1:00-5:00 PM EST)
