## **Job Title:** Wastewater Collection System Operator 2

This job is a mid-level role that will participate in the operation and maintenance of the wastewater collection system.

Salary Range: Dependent on Qualification

### **Minimum Requirements:**

High School Diploma, GED or equivalent.

Ability to obtain a CDL class A within two years (ACWA will provide training)

5 Years of wastewater collection experience at a medium or large size utility

Knowledge and experience of sewer lift station maintenance, repair and operation

Knowledge and experience with electrical wiring and mechanical repairs associated with sewer lift stations

Ability to be on-call and respond to call outs as needed to support the operation of the collection system

Ability to wear all required PPE and adhere to all policies

Ability to work in confined spaces

Ability to work in all weather conditions

Ability to work in environments and in close proximity to chemicals and other fluids requiring PPE utilization

Ability to physically perform requirements of the job involving working extended hours as needed

Ability to learn new technologies and operate software such as GIS, work order management software and other programs to assist in record keeping.

Ability to monitor SCADA software and respond to alerts after hours

### **Preferred Qualifications:**

Associates Degree in a science program, business or engineering

Experience performing smoke tests of sewer mains and performing camera inspections

State of Tennessee Grade I or Grade 2 Collection System Operator certification

State of Tennessee Biological/Natural System Operator certification

Supervisory experience with leadership ability

Specialized training or experience in water/sewage pump & motor maintenance and repair

Specialized training or experience in SCADA troubleshooting, control wiring and installation

Experience operating heavy equipment not limited to excavators, dump trucks and sewer jet/vac trucks

This job description and the duties required are not limited to those listed. The role of the Wastewater Collection System Operator 2 is a dynamic position that evolves based on the needs of the collection system and the requirements to serve the community at the required level of service and meet the requirements of the EPA and the Tennessee Department of Conservation.
